We want to hear from you!

General Motors awarded the City of Toledo a “GM on Main Street Grant” to fund a site-specific visioning effort for the series of City-owned parcels along Dorr Street, between Hoag Street and Smead Avenue. Currently unoccupied, these parcels were previously the site of multiple Black-owned small businesses until their removal during the urban renewal activities of the early 1970s. The goal of this project is to explore potential redevelopment opportunities and generate recommendations that support ongoing community efforts to re-activate this once thriving commercial corridor.

Please join The City of Toledo and the Collaborative, to give your input on potential uses and improvements that should be considered to create a future vibrant neighborhood center. We want to hear from you!
