

Sanitary Sewer Overflow Annual Report Division of Surface Water

Date: 03/20/2019

Facility Name: Toledo Bay View Park WWTP

Ohio NPDES Permit Number: 2PF00000*ND

Period Covered by Report: 01/01/2018 - 12/31/2018

Contact Person

Name: Adam Zolciak

Title: Sr. Professional Engineer

Mailing Address: 4032 Creekside

City: Toledo

State: OH

Zip Code: 43612

Country: USA

Sanitary Sewer Overflows Spreadsheet(attachment) : 2018 Reporting Period Toledo SSOOverflow.xlsm

Water In Basement Occurrences Spreadsheet(attachment) : 2018 Reporting Period Toledo WIBOccurrences.xlsm

Narrative analysis of WIB patterns by location, frequency and cause: *There was no notable pattern for WBs(Water in Basement). Annual rainfall was higher than average(data attached from Toledo Express), therefore it isn't surprising that the total occurrences are similar to the previous year. No time periods throughout the year produced any unusual or a greater than average number of rain events. Service Requests(SR)for WB typically increase when the area experiences a great deal of rain in a short time. A rain event is established by the Sewer Division when crews are required to respond to the SRs on a around the clock basis until the incoming SRs cease. Most of the WBs were caused by various blockages in the main and/or overloaded due to excessive rainfall(see attached 2018 WBs CW report).*

The greatest amount of rain that fell in 2018 was the month of May. May 2018 exceeded the average rainfall and the May 2017 rainfall totals.
