Dear Secretary Buttigieg:

I am pleased to send this letter in support of the City of Toledo's Department of Transportation RAISE Grant application. Having joined city leaders, community members, small business owners, non-profit leaders, and others who were directly involved with the development of this application, I can attest that it addresses many of the needs outlined during our community conversations. The Uptown and Junction neighborhoods identified as the focus for this grant have experienced historic disinvestment and neglect that can begin to be reversed with the strategic plan and vision that has been agreed upon and can be catalyzed with DOT funds.

The Ability Center of Greater Toledo is a Center for Independent Living, a consumer-controlled, cross-disability non-for-profit organization that seeks to make our community the most disability-friendly in the nation. We know first-hand that improvements to sidewalks and the public right of way are key to increasing the accessibility of neighborhoods in Toledo and encouraging independence. We look forward to continuing to assist the City of Toledo in improving pedestrian connectivity between the Junction and Uptown neighborhoods, including for people with disabilities, including with better lighting, wayfinding and other safety measures.

I am hopeful that our thoughtful and comprehensive plan outlined in the application will be reviewed favorably. Our community members need and deserve the increased access to services, opportunities, and amenities this project will provide. I am proud to have been part of the process to bring this plan together and would be happy to answer any questions you may have.

Sincerely,

Stuart James
Executive Director

Dear Secretary Buttigieg:

I am pleased to provide this letter in support of the City of Toledo's Department of Transportation RAISE Grant application. As a representative of The Arts Commission, and a participant in the development of this application, I can confirm that the application addresses many of the needs outlined not only during community conversations related directly to the application, but also to many other discussions and conversations about the needs of surrounding neighborhoods.

By improving the connectivity between the Junction and Uptown neighborhoods through dedicated bike and pedestrian corridors with better lighting, wayfinding and other safety measures, we can bring the services and opportunities available in Uptown to the residents of Junction. The Uptown neighborhood is the location of a newly formed Social Innovation District anchored by Toledo Innovation Center which is a historic building undergoing extensive renovation in order to house a variety of services including, technical training, apprenticeships, small business supports and other wrap around services to help ensure success of the individuals involved in the programs. The proposed improvements fit into the broader strategic plan for the entire city and region.

The Arts Commission has worked for the last seven years in both the UpTown and Junction neighborhoods, utilizing arts strategies to help residents improve safety and beautify their communities, and to build long-term, sustainable connections to resources and networks that lead to infrastructure enhancements. The improvements proposed in this City of Toledo RAISE application align with The Arts Commission's proposed Culture Trail, a bike and pedestrian friendly corridor which connects residents from Junction, through UpTown, to Downtown and the Warehouse District, and into East Toledo, highlighting recreational and cultural assets along the way.

The city is committed to building on the momentum from significant public and private partnerships that are enhancing our convention center, our riverfront, and our central business district. Additional investment in connected neighborhoods accelerates brings economic opportunity to areas that have experienced disinvestment for many years. The intentional planning and community involvement have resulted in a plan that will elevate our neighborhoods, increase economic opportunity and improve

overall quality of life. Furthermore, by increasing access to safe pedestrian and bicycle corridors, we will reap the health benefits as well.

I am hopeful that the comprehensive plan outlined in this application will be reviewed favorably. Our community members need and deserve the increased access to services, opportunities, and amenities this project will provide. I am proud to have been part of the process to bring this plan together and would be happy to answer any questions you may have.

Sincerely,

Jennifer Jarrett

Re: City of Toledo Raise Grant Application

Dear Secretary Buttigieg,

On behalf of Bitwise Industries, we write to support the City of Toledo's Department of Transportation RAISE grant application. The proposed project will be a catalyst for the ongoing development of Toledo's transportation system, which is important to the success of the launch of our tech ecosystem in the city. Toledo has a long history of disinvestment in many of the neighborhoods our employees, students, and stakeholders come from, and the plan outlined in the RAISE grant application brings economic development, education, and even entertainment opportunities to neighborhoods that have missed the economic rebound that has occurred in other areas of our city.

Since 2013, Bitwise Industries, a female and minority-led technology company headquartered in Fresno, CA, has been training unexpected people from underestimated places for jobs in the digital economy. Our workforce programs have trained over 8,000 student workers, with 80% of job seekers finding employment in tech jobs following our program, resulting in over a quarter of a billion dollars of aggregate wages, mostly for women and minorities. Many of these individuals have gone from making under \$21K/year to well over \$61K/year. Furthermore, the technology consulting side of our business has hired many of these students to help cities build and strengthen their digital infrastructure, proving it is possible to build stellar technology in underrepresented places with diverse, nontraditional talent. In 2021, we announced our expansion to Toledo and plan to partner with ProMedica to develop Toledo's Jefferson Building. We began offering coding and web development classes to Toledoans in September 2021.

With this RAISE grant, Toledo would be able to connect the historically disadvantaged Junction neighborhood to the Uptown neighborhood, and specifically the Social Innovation

District (SID) under development in Uptown, which will provide the backdrop for maturation of Bitwise Industries' digital equity model. The SID is anchored by the Toledo Innovation Center, which is a historic building undergoing extensive renovation in order to house a variety of services including Bitwise Industries' nationally recognized workforce development programming, tech consulting, and community-building activities. By recruiting underestimated humans into technology apprenticeships based out of the Toledo Innovation Center, and leveraging their talents to strengthen digital infrastructure in our communities, we will transform the regional economy, increase local demand for technology, and expand pathways into high wage, high growth jobs.

The City of Toledo's project will reduce transportation barriers that could and have prevented people from accessing high wage jobs in Toledo. The project will also bring the pedestrian and bicycle traffic necessary to support the numerous minority-owned businesses established in the Junction neighborhood and increase their economic stability. Currently, Uptown and Junction are connected by expressway overpasses without adequate pedestrian or bicycle infrastructure. Despite high ridership, the bus routes do not have bus stops with amenities. The plan outlined in the grant will improve safety and accessibility while at the same time creating a sense of neighborhood identity. Moreover, with increased access to education and economic development opportunities, residents in both neighborhoods can build their wealth.

Toledo is building on recent investments via American Rescue Plan funds, private philanthropy and public/private partnerships. If funded, the RAISE grant will sustain the city's upward trajectory and ensure equitable outcomes by bringing additional opportunities to these historically underserved neighborhoods and spur additional investment in small and minority owned businesses, housing and arts and cultural institutions. This vision for Uptown and Junction fit solidly within the DOT's goals.

Sincerely,

A handwritten signature in black ink, appearing to read 'Tammi Sherman', with a stylized, flowing script.

Dear Secretary Buttigieg:

It is my sincere pleasure to support the City of Toledo's Department of Transportation RAISE grant application. This funding opportunity is aligned incredibly well with Cherry Street Mission Ministries vision and strategic plan for the region and will be a catalyst for the ongoing development of our transportation system. Toledo has a long history of disinvestment in many of our neighborhoods and the plan outlined in the RAISE grant application brings economic development, education, and even entertainment opportunities to neighborhoods that have missed the economic rebound that has occurred in other area of our city.

The goal of the RAISE grant is to connect the historically disadvantaged Junction neighborhood to the Uptown neighborhood, and specifically the Social Innovation District (SID) under development in Uptown. The SID is anchored by the Toledo Innovation Center which is a historic building undergoing extensive renovation in order to house a variety of services including, technical training, apprenticeships, small business supports, and other wrap around services to help ensure success of the individuals involved in the programs. The project will also bring the pedestrian and bicycle traffic necessary to support the numerous minority-owned businesses established in the Junction neighborhood and increase their economic stability. Currently, Uptown and Junction are connected by expressway overpasses without adequate pedestrian or bicycle infrastructure. Despite high ridership, the bus routes do not have bus stops with amenities. The plan outlined in the grant will improve safety and accessibility while at the same time, create a sense of neighborhood identity. Moreover, with increased access to education and economic development opportunities, residents in both neighborhoods can build their wealth.

Toledo is building on recent investments via ARP funds, private philanthropy and public/private partnerships that will continue the upward trajectory. If funded, the RAISE grant will bring additional opportunities to our neighborhoods and spur additional investment in small and minority owned businesses, housing and arts and cultural institutions. I firmly believe this vision for Uptown and Junction fit solidly within the DOT's goals and I hope to learn of its favorable review.

Best regards,

Dear Secretary Buttigieg:

It is my sincere pleasure to support the City of Toledo's Department of Transportation RAISE grant application. This funding opportunity is aligned incredibly well with the vision and strategic plan of Connecting Kids To Meals for the region, and will be a catalyst for the ongoing development of our transportation system. Connecting Kids To Meals is a hunger-relief nonprofit that provides healthy meals at no cost to at-risk kids ages 18 and under who are located in low-income and underserved areas of Northwest Ohio. We have been feeding hungry kids for about 19 years.

Toledo has a long history of disinvestment in many of our neighborhoods and the plan outlined in the RAISE grant application brings economic development, education, and even entertainment opportunities to neighborhoods that have missed the economic rebound that has occurred in other area of our city. The goal of the RAISE grant is to connect the historically disadvantaged Junction neighborhood to the Uptown neighborhood, and specifically the Social Innovation District (SID) under development in Uptown. March 23, 2022

Dear Secretary Buttigieg,

I support the City of Toledo's Department of Transportation RAISE Grant application. Having joined city leaders, community members, small business owners, non-profit leaders, and others who were directly involved, I can attest that it addresses many of the needs outlined during our community conversations. In many ways, Toledo is experiencing a rebirth after decades of decline, however, this growth and redevelopment has not yet reached many of our neighborhoods. The Uptown and Junction neighborhoods located within and adjacent to downtown, identified as the focus for this grant, have experienced historic disinvestment and neglect that can begin to be reversed with the strategic plan and vision that has been agreed upon and can be catalyzed with DOT funds.

By improving the connectivity between the Junction and Uptown neighborhoods through dedicated bike and pedestrian corridors with better lighting, wayfinding and other safety measures, we can bring the services and opportunities available in Uptown to the residents of Junction. The Uptown neighborhood is the location of a newly formed Social Innovation District anchored by Toledo Innovation Center which is a historic building undergoing extensive renovation in order to house a variety of services including technical training, apprenticeships, small business supports and other wrap around services specifically focused on an underserved population living in the Uptown and Junction neighborhoods as well as other surrounding neighborhoods. The community has partnered with Bitwise Industries to bring their proven track record of upskilling an underserved population to anchor the Social Innovation District. The proposed improvements build upon the planned infrastructure projects the City is undertaking to upgrade aging water and sewer lines and fits into the broader strategic plan for downtown and the city. These improvements will positively impact all of downtown as we can attract additional job opportunities and increase the standard of living for the residents in these neighborhoods.

The City is committed to building on the momentum from significant public and private partnerships that are enhancing our convention center, our riverfront, and our central business district. Additional investment in these neighborhoods accelerates our progress by bringing economic opportunity to areas that have been disinvested for many years. The intentional planning and community involvement have resulted in a plan that will elevate our neighborhoods, increase economic opportunity, and improve overall quality of life. Furthermore, by increasing access to safe pedestrian and bicycle corridors, we will reap the health benefits as well. And because our communities suffer disproportionate poor health, these benefits are incredibly important.

I am hopeful that our thoughtful and comprehensive plan outlined in the application will be reviewed favorably. Our community members need and deserve the increased access to services, opportunities, and amenities this project will provide. I am proud to have been part of the process to bring this plan together and would be happy to answer any questions you may have.

Sincerely,

Paul L. Toth

Dear Secretary Buttigieg:

It is my sincere pleasure to support the City of Toledo's Department of Transportation RAISE grant application. This funding opportunity is well-aligned with Lucas Metropolitan Housing's Junction-McClinton Nunn Choice Neighborhood's Initiative Transformation Plan vision. In this vision, the CNI team proposes the creation of strong physical and functional connections to downtown Toledo and other surrounding neighborhoods that will be a catalyst for the ongoing development of our transportation system. Toledo has a long history of disinvestment in many of our neighborhoods and the plan outlined in the RAISE grant application brings economic development, education, and even entertainment opportunities to neighborhoods that have missed the economic rebound that have occurred in other areas.

The goal of the RAISE grant is to connect the historically disadvantaged Junction neighborhood to the Uptown neighborhood, and specifically the Social Innovation District (SID) under development in Uptown. The SID is anchored by the Toledo Innovation Center, a historic building undergoing extensive renovation to house a variety of services. These services include technical training, apprenticeships, small business supports, among others, and will help ensure the success of the individuals involved in the programs. The project will also bring the pedestrian and bicycle traffic necessary to support the numerous minority-owned businesses established in the Junction neighborhood and increase their economic stability.

Currently, Uptown and Junction are connected by expressway overpasses without adequate pedestrian or bicycle infrastructure. Despite high ridership, the bus routes do not have bus stops with amenities. The plan outlined in the application will improve safety and accessibility, while also creating a sense of neighborhood identity. Moreover, with increased access to education and economic development opportunities, residents in both neighborhoods can build their wealth.

Toledo is building on recent investments using ARP funds, private philanthropy and public/private partnerships that will create an upward trajectory. If funded, the RAISE grant will bring opportunities to our neighborhoods and spur additional investment in small and minority owned businesses, housing, and arts and cultural institutions. I firmly believe this vision for the Uptown and Junction neighborhoods fit solidly within the DOT's goals, and I hope to learn of its favorable review.

Dear Secretary Buttigieg:

I am pleased to send this letter in support of the City of Toledo's Department of Transportation RAISE Grant application. Having joined city leaders, community members, small business owners, non-profit leaders, and others who were directly involved with the development of this application, I can attest that it addresses many of the needs outlined during our community conversations. In many ways, Toledo is experiencing a rebirth after decades of decline, however this growth and redevelopment has not yet reached many of our neighborhoods. The Uptown and Junction neighborhoods identified as the focus for this grant have experienced historic disinvestment and neglect that can begin to be reversed with the strategic plan and vision that has been agreed upon and can be catalyzed with DOT funds.

By improving the connectivity between the Junction and Uptown neighborhoods through dedicated bike and pedestrian corridors with better lighting, wayfinding and other safety measures, we can bring the services and opportunities available in Uptown to the residents of Junction. The Uptown neighborhood is the location of a newly formed Social Innovation District anchored by Toledo Innovation Center which is a historic building undergoing extensive renovation in order to house a variety of services including, technical training, apprenticeships, small business supports and other wrap around services to help ensure success of the individuals involved in the programs. The proposed improvements build upon the planned infrastructure projects the city is undertaking to upgrade aging water and sewer lines and fits into the broader strategic plan for the entire city and region.

ZDL Ventures, Inc. dba Manhattan's Pub 'n Cheer is a family-owned restaurant established in 2002. Manhattan's was an early investor in the rebirth of the Adams Street Corridor in Uptown, and has since become the neighborhood pub where local residents, workers, students and folks from all around metropolitan Toledo gather for great food, beverages and fellowship. Our long term success has always been linked to the continuous growth and development of the Uptown neighborhood, and to that end, we strongly support the City of Toledo's application for the RAISE grant. In addition to improving accessibility to our district from adjoining neighborhoods, we welcome the infrastructure improvements that the grant proceeds promise to cover, particularly the streetscaping and lighting improvements for Adams Street that have been on the drawing boards for years.

The city is committed to building on the momentum from significant public and private partnerships that are enhancing our convention center, our riverfront, and our central business district. Additional investment in these neighborhoods accelerates our progress by bringing economic opportunity to areas that have been disinvested for many years. The intentional planning and community involvement have resulted in a plan that will elevate our neighborhoods, increase economic opportunity and improve overall quality of life. Furthermore, by increasing access to safe pedestrian and bicycle corridors, we will reap the health benefits as well. And because our communities suffer disproportionate poor health, these benefits are incredibly important.

I am hopeful that our thoughtful and comprehensive plan outlined in the application will be reviewed favorably. Our community members need and deserve the increased access to services, opportunities, and amenities this project will provide. I am proud to have been part of the process to bring this plan together and would be happy to answer any questions you may have.

Sincerely,

Marty Lahey

The Uptown and Junction neighborhoods identified as the focus for this grant have experienced historic disinvestment and neglect that can begin to be reversed with the strategic plan and vision that has been agreed upon and can be catalyzed with DOT funds.

By improving the connectivity between the Junction and Uptown neighborhoods through dedicated bike and pedestrian corridors with better lighting, wayfinding and other safety measures, we can bring the services and opportunities available in Uptown to the residents of Junction. The Uptown neighborhood is the location of a newly formed Social Innovation District anchored by the Toledo Innovation Center which is a historic building undergoing extensive renovation in order to house a variety of services including, technical training, apprenticeships, small business supports and other wrap around services to help ensure success of the individuals involved in the programs. The proposed improvements build upon the planned infrastructure projects the city is undertaking to upgrade aging water and sewer lines and fits into the broader strategic plan for the entire city and region.

The project proposed in this application compliments Metroparks Toledo vision for the Glass City Riverwalk and a thriving, vibrant downtown with 300 acres of new and revitalized riverfront greenspace connected by five miles of multi-use trail. We believe it is important to invest in public spaces where our residents can gather to build life-long connections to each other and nature.

Dear Secretary Buttigieg:

I am pleased to send this letter in support of the City of Toledo's Department of Transportation RAISE Grant application. In joining city leaders, community members, small business owners, non-profit leaders, and others who were directly involved with the development of this application, I can attest that it addresses many of the needs outlined during community conversations. In many ways, Toledo is experiencing a rebirth after decades of decline, however this growth and redevelopment has not yet reached many of the City's neighborhoods. The Uptown and Junction neighborhoods identified as the focus for this grant have experienced historic disinvestment and neglect that can begin to be reversed with the agreed upon strategic plan and vision that can be catalyzed with DOT funds.

By improving the connectivity between the Junction and Uptown neighborhoods through dedicated bike and pedestrian corridors with better lighting, wayfinding and other safety measures, the City can bring the services and opportunities available in Uptown to the residents of Junction. The Uptown neighborhood is the location of a newly formed Social Innovation District anchored by Toledo Innovation Center which is a historic building undergoing extensive renovation in order to house a variety of services including, technical training, apprenticeships, small business supports and other wrap around services to help ensure success of the individuals involved in the programs. The proposed improvements build upon the planned infrastructure projects the City is undertaking to upgrade aging water and sewer lines and fits into the broader strategic plan for the entire city and region.

The City's investment in its infrastructure is expected to create a flow of construction jobs. Northwest Ohio Building Trades Council ("NWOBTC") represents over 17,000 of the construction workers who will benefit from this job creation. NWOBTC's construction workers' qualifications, skills, and training are unparalleled. Since 2016, the City of Toledo has demonstrated its commitment to responsible job creation by adopting a project labor agreement ("PLA") ordinance for its construction projects. The City's PLA requirements protects taxpayers and our community - it helps ensure

1600 Front Street / Toledo, OH 43605
(419) 693-7717 / www.toledoconstruction.com

construction project delivery on-time, on-or-under budget, and with the highest quality workforce in accordance with area standards for wages and benefits.

The City is committed to building on the momentum from significant public and private partnerships that are enhancing our convention center, our riverfront, and our central business district. Additional investment in these neighborhoods accelerates the City's progress by bringing economic opportunity to areas that have been disinvested for many years. The intentional planning and community involvement have resulted in a plan that will elevate the City's neighborhoods, increase economic opportunity, and improve overall quality of life. Furthermore, by increasing access to safe pedestrian and bicycle corridors, we will reap the health benefits from which our communities disproportionately suffer.

I am optimistic that the City's thoughtful and comprehensive plan outlined in its application will be reviewed favorably. Our community needs the jobs that will be created by the infrastructure projects and deserves the increased access to services, opportunities, and amenities this project will provide.

Sincerely,

Shaun Enright, Business Manager/Executive Secretary

Dear Secretary Buttigieg:

It is my sincere pleasure to support the City of Toledo's Department of Transportation RAISE grant application. This funding opportunity is aligned incredibly well with the Ohio Department of Transportation's vision and strategic plan for the region and will be a catalyst for the ongoing development of our transportation system. Toledo has a long history of disinvestment in many of their neighborhoods and the plan outlined in the RAISE grant application brings economic development, education, and even entertainment opportunities to neighborhoods that have missed the economic rebound that has occurred in other areas of their city.

The goal of this RAISE grant application is to connect the historically disadvantaged Junction neighborhood to the Uptown neighborhood, and specifically the Social Innovation District (SID) under development in Uptown. The SID is anchored by the Toledo Innovation Center which is a historic building undergoing extensive renovation in order to house a variety of services including, technical training, apprenticeships, small business supports, and other wrap around services to help ensure success of the individuals involved in the programs. The project will also bring the pedestrian and bicycle traffic necessary to support the numerous minority-owned businesses established in the Junction neighborhood and increase their economic stability. Currently, the streets connecting Junction to Uptown are not pedestrian and bike friendly, nor do they have amenitized bus stops despite the high ridership. The plan outlined in the grant will improve safety and accessibility while at the same time, create a sense of neighborhood identity. Moreover, with increased access to education and economic development opportunities, residents in both neighborhoods can build their wealth.

Toledo is building on recent investments via ARP funds, private philanthropy and public/private partnerships that will continue the upward trajectory. If funded, the RAISE grant will bring additional opportunities to our neighborhoods and spur additional investment in small and minority owned businesses, housing and arts and cultural institutions. I firmly believe this vision for Uptown and Junction fit solidly within the DOT's goals and I hope to learn of its favorable review.

Best regards,

A handwritten signature in black ink, reading "Pat McColley".

March 31, 2022

The Honorable Pete Buttigieg
Secretary of Transportation
U.S. Department of Transportation
1200 New Jersey Ave, SE
Washington, DC 20590

Dear Secretary Buttigieg:

Owens Corning is pleased to support the City of Toledo's RAISE grant application for the Connecting Toledo Neighborhoods to Opportunity (CTNO) project. The City's plan as outlined in the application promises to boost climate friendly economic development, increase resiliency and help provide much needed economic opportunity to neighborhoods in need.

Owens Corning is proud to be based in Toledo, Ohio where we employ more than 1,000. Our company is a global building and construction materials leader committed to building a sustainable future through material innovation. Our three integrated businesses – Composites, Insulation, and Roofing – provide durable, sustainable, energy-efficient solutions that leverage our unique material science, manufacturing, and market knowledge to help our customers win and grow. We are global in scope and human in scale with approximately 20,000 employees in 33 countries dedicated to making a difference in the communities where we work and live.

The goal of the CTNO project is to better connect the historically disadvantaged Junction neighborhood to a variety of city services including, technical training, apprenticeships, small business assistance, and other wrap around services. The project will enhance pedestrian and bicycle access to support the numerous minority-owned businesses established in the neighborhood. The only access currently available is an expressway overpass lacking adequate pedestrian and bicycle infrastructure. City planners expect the project will improve safety and accessibility.

Toledo has never been a more exciting place to call home. City leaders and the business community are working collaboratively, building on recent investments from ARP funds, private philanthropy and public/private partnerships that will continue the City's upward trajectory. If funded, the RAISE grant could bring additional opportunities to our community and spur investment in small and minority owned businesses, affordable housing and arts and cultural institutions.

I respectfully urge your support for this important project and appreciate your full and fair consideration.

Sincerely,

A handwritten signature in black ink that reads "Don Rettig".

Office of Infrastructure Finance and Innovation
Office of the Secretary of Transportation
1200 New Jersey Ave, SE
Washington, DC 20590

Dear Secretary Buttigieg:

I am pleased to send this letter in support of the City of Toledo's Department of Transportation (DOT) RAISE Grant application. ProMedica, a non-profit health and well-being organization headquartered in Toledo, was proud to join city leaders, community members, small business owners, non-profit leaders, and others who worked collaboratively to develop this competitive application. I was impressed by the open dialogue, creative thinking and problem solving that took place in to address many of the transportation issues facing our community. ProMedica has been actively supporting much of the city's rebirth with investments in our corporate headquarters as well as through our significant work in social determinants of health. We are proud of progress the community is making as it strives to redevelop many of its neighborhoods that have experienced decades of disinvestment and decline. The Uptown and Junction neighborhoods that are the focus of this grant application were identified due to their historic neglect that can begin to be reversed with the strategic plan and vision that has been agreed upon and can be catalyzed with DOT funds.

We are confident that improving the connectivity between the Junction and Uptown neighborhoods through dedicated bike and pedestrian corridors with better lighting, wayfinding and other safety measures, will bring the services and opportunities available in Uptown to the residents of Junction. The Uptown neighborhood is the location of a newly formed Social Innovation District anchored by Toledo Innovation Center which is a historic building undergoing extensive renovation in order to house a variety of services including, technical training, apprenticeships, small business supports and other wrap around services to help ensure success of the individuals involved in the programs. The proposed improvements build upon the planned infrastructure projects the city is undertaking to upgrade aging water and sewer lines and fits into the broader strategic plan for the entire city and region.

As an organization whose mission is to improve health and well-being, we know that access to safe multimodal transportation, access to education and employment all have positive effects on health outcomes. Both the Uptown and Junction neighborhoods have some of the worst health outcomes in our region and as such, we are happy this transportation project will provide

Our Mission is to
improve your health
and well-being.

significant investment that can turn the tide on these discouraging and dangerous statistics. The project also supports the significant investment ProMedica has undertaken in the Uptown neighborhood over the past several years, as we built a grocery store with a teaching kitchen, opened a Financial Opportunity Center and host educational, entertainment and health events to build community. Our efforts are part of our overall commitment to addressing the social determinants of health and the plans outlined in the RAISE grant application align well with our goals and accelerate our upward trajectory.

We are hopeful that our thoughtful and comprehensive plan outlined in the application will be reviewed favorably. Our community members need and deserve the increased access to services, opportunities, and amenities this project will provide. ProMedica is proud to have been part of the process to bring this plan together and would be happy to answer any questions you may have.

Best regards,

Re: Support Letter for City of Toledo RAISE Grant Application

Dear Secretary Buttigieg:

I am thrilled to join community leaders, small business owners and residents of northwest Ohio in support of the City of Toledo's Department of Transportation RAISE Grant application. As one of the many people involved with the development of this application, I can attest that this plan addresses the needs of our public transportation customers, in addition to the region in general.

While Toledo is experiencing a rebirth after decades of decline, the benefits of this growth and redevelopment have not yet reached many of our neighborhoods. The Uptown and Junction neighborhoods identified as the focus for this grant have experienced historic disinvestment and neglect that can begin to be reversed with the steps outlined in this application.

As the Toledo area's public transportation system, we are no stranger to the financial and mobility challenges posed to residents in these neighborhoods. More than 80 percent of TARTA riders polled do not have access to a vehicle, and more than 86 percent of customers have an income that places them below the poverty line.

Taking what steps we can to correct these imbalances is one of the reasons TARTA is embarking on TARTA Next, its first system redesign in decades. Better bus service will help create affordable access to jobs, medical appointments, and education, and pave the way for a more equitable region.

Connecting the Junction and Uptown neighborhoods accomplishes these same goals. Through dedicated bike and pedestrian corridors with better lighting, wayfinding, and other safety measures, we can bring the services and opportunities

1127 West Central Avenue, P.O. Box 792

TARTA.COM

TOLEDO AREA REGIONAL TRANSIT AUTHORITY

available in Uptown to the residents of Junction. The Uptown neighborhood is the location of the new Toledo Innovation Center, which will house technical training, apprenticeships, small business programs and other services.

Toledo has demonstrated a commitment to building on the momentum from significant public and private partnerships that are enhancing our convention center, our riverfront, and our central business district. Additional investment in these neighborhoods accelerates our progress by bringing economic opportunity to new areas.

TARTA sees its involvement in the comprehensive plan outlined in this application as another way to empower people to make connections. Our community members need and deserve the increased access to services, opportunities, and amenities this project will provide.

Sincerely,

Dear Secretary Buttigieg:

It is my sincere pleasure to support the City of Toledo's Department of Transportation RAISE grant application. This funding opportunity is aligned with the LISC Toledo vision and strategic framework for the region and will be a catalyst for the ongoing development of our transportation system. Toledo has a long history of disinvestment in many of our neighborhoods and the plan outlined in the RAISE grant proposal links economic development, education, and entertainment opportunities to neighborhoods that have been under resourced and are not experience the economic growth that is occurring in other areas of our city.

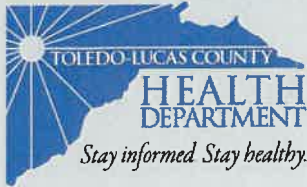

The goal of the RAISE grant is to connect the historically disinvested neighborhoods, Junction and Uptown neighborhoods to the Social Innovation District (SID) under development in Uptown. The SID is anchored by the Toledo Innovation Center, which is a historic building undergoing extensive renovation in order to house a variety of services including, technical training, apprenticeships, small business supports, and other wrap around services to ensure that the residents living in the adjacent neighborhoods have access to in-demand career paths. The project will create multimodal transit for pedestrian and bicycle traffic necessary to support minority-owned businesses established in the Junction neighborhood and increase their economic stability. Currently, the streets connecting Junction to Uptown are not pedestrian and bike friendly, nor do they have bus stops despite the high ridership. The plan outlined in the proposal will improve safety and accessibility while at the same time; create a sense of neighborhood identity. Moreover, with increased access to education and economic development opportunities, residents in both neighborhoods can build their wealth.

Toledo is building on recent investments of New Market Tax Credits, Historic Tax Credits, ARP funds, private philanthropy, and public/private partnerships that will continue the upward trajectory. If funded, the RAISE proposal will bring additional opportunities to our neighborhoods and spur additional investment in small and minority owned businesses, housing, and arts and cultural. I firmly believe this vision for Uptown and Junction fit solidly within the DOT's goals and I hope to learn of its favorable review.

RE: City of Toledo's Department of Transportation RAISE Grant Application

Dear Secretary Buttigieg:

I am pleased to send this letter in support of the City of Toledo's Department of Transportation RAISE Grant application. Having joined city leaders, community members, small business owners, non-profit leaders, and others who were directly involved with the development of this application, I can attest that it addresses many of the needs outlined during our community conversations. In many ways, Toledo is experiencing a rebirth after decades of decline, however this growth and redevelopment has not yet reached many of our neighborhoods. The Uptown and Junction neighborhoods identified as the focus for this grant have experienced historic disinvestment and neglect that can begin to be reversed with the strategic plan and vision that has been agreed upon and can be catalyzed with DOT funds.

The Toledo Metropolitan Area Council of Governments (TMACOG) is the metropolitan planning organization for northwestern Ohio and southeastern Michigan. Our transportation planning region includes Lucas and Wood counties in Ohio and the southern three townships of Monroe County, Michigan. TMACOG aims to achieve a transportation system that is safe, efficient and serves all users. TMACOG maintains a regional Long Range Transportation Plan (LRP) that looks out 20 years and guides future transportation investments. Enhancing personal mobility through multimodal connections is identified as a goal in the LRP and is consistently recognized by members of the public as a need in their communities. The connection between the Junction and Uptown neighborhoods was identified as a priority on the LRP's priority project list.

By improving the connectivity between the Junction and Uptown neighborhoods through dedicated bike and pedestrian corridors with better lighting, wayfinding, and other safety measures, we can bring the services and opportunities available in Uptown to the residents of Junction. The Uptown neighborhood is the location of a newly formed Social Innovation District anchored by the Toledo Innovation Center, which is a historic building undergoing extensive renovation in order to house a variety of services including, technical training, apprenticeships, small business supports and other wrap around services to help ensure success of the individuals involved in the programs. The proposed improvements build upon the planned infrastructure projects the city is undertaking to upgrade aging water and sewer lines and fits into the broader strategic plan for the entire city and region.

Our Vision: TMACOG will be the governmental partner of choice to coordinate regional assets, opportunities, and challenges.

Dear Secretary Buttigieg:

It is my sincere pleasure to support the City of Toledo's Department of Transportation RAISE grant application. This funding opportunity is aligned incredibly well with Toledo Public Schools' vision and strategic plan for the region and will be a catalyst for the ongoing development of our transportation system. Toledo has a long history of disinvestment in many of our neighborhoods and the plan outlined in the RAISE grant application brings economic development, education, and even entertainment opportunities to neighborhoods that have missed the economic rebound that has occurred in other area of our city.

The goal of the RAISE grant is to connect the historically disadvantaged Junction neighborhood to the Uptown neighborhood, and specifically the Social Innovation District (SID) under development in Uptown. The SID is anchored by the Toledo Innovation Center which is a historic building undergoing extensive renovation in order to house a variety of services including, technical training, apprenticeships, small business supports, and other wrap around services to help ensure success of the individuals involved in the programs. The project will also bring the pedestrian and bicycle traffic necessary to support the numerous minority-owned businesses established in the Junction neighborhood and increase their economic stability. Currently, Uptown and Junction are connected by expressway overpasses without adequate pedestrian or bicycle infrastructure. Despite high ridership, the bus routes do not have bus stops with amenities. The plan outlined in the grant will improve safety and accessibility while at the same time, create a sense of neighborhood identity. Moreover, with increased access to education and economic development opportunities, residents in both neighborhoods can build their wealth.

Toledo is building on recent investments via ARP funds, private philanthropy and public/private partnerships that will continue the upward trajectory. If funded, the RAISE grant will bring additional opportunities to our neighborhoods and spur additional investment in small and minority owned businesses, housing and arts and cultural institutions. I firmly believe this vision for Uptown and Junction fit solidly within the DOT's goals and I hope to learn of its favorable review.

Sincerely,

Dear Secretary Buttigieg:

It is my sincere pleasure to support the City of Toledo's Department of Transportation RAISE grant application. This funding opportunity is aligned incredibly well with Toledo School for the Art's vision and strategic plan for the region and will be a catalyst for the ongoing development of our transportation system. Toledo has a long history of disinvestment in many of our neighborhoods and the plan outlined in the RAISE grant application brings economic development, education, and even entertainment opportunities to neighborhoods that have missed the economic rebound that has occurred in other area of our city.

The goal of the RAISE grant is to connect the historically disadvantaged Junction neighborhood to the Uptown neighborhood, and specifically the Social Innovation District (SID) under development in Uptown. The SID is anchored by the Toledo Innovation Center which is a historic building undergoing extensive renovation in order to house a variety of services including, technical training, apprenticeships, small business supports, and other wrap around services to help ensure success of the individuals involved in the programs. The project will also bring the pedestrian and bicycle traffic necessary to support the numerous minority-owned businesses established in the Junction neighborhood and increase their economic stability. Currently, the streets connecting Junction to Uptown are not pedestrian and bike friendly, nor do they have amenitized bus stops despite the high ridership. The plan outlined in the grant will improve safety and accessibility while at the same time, create a sense of neighborhood identity. Moreover, with increased access to education and economic development opportunities, residents in both neighborhoods can build their wealth.

Toledo is building on recent investments via ARP funds, private philanthropy and public/private partnerships that will continue the upward trajectory. If funded, the RAISE grant will bring additional opportunities to our neighborhoods and spur additional investment in small and minority owned businesses, housing and arts and cultural institutions. I firmly believe this vision for Uptown and Junction fit solidly within the DOT's goals and I hope to learn of its favorable review.

Subcommittee on Interior, Environment,
and Related Agencies

COMMITTEE ON VETERANS' AFFAIRS

Subcommittee on Disability Assistance
and Memorial Affairs

Honorable Peter Buttigieg
Office of the Secretary
U.S. Department of Transportation
West Building, 1200 New Jersey Ave., SE, 9th floor
Washington, D.C. 20590

Dear Secretary Buttigieg:

I am pleased to express strong support for the proposal from the City of Toledo to the U.S. Department of Transportation for the Rebuilding American Infrastructure with Sustainability and Equity (RAISE) grant. RAISE funding will allow the City of Toledo to implement its strategic plan and vision for our region, serving as a catalyst for ongoing transportation developments. This proposal will bolster disadvantaged neighborhoods and connect communities to important resources in Toledo's city center.

This opportunity would empower the City of Toledo to connect the historically underserved Junction neighborhood to the Uptown neighborhood, and specifically the Social Innovation District (SID) under development in Uptown. The cornerstone of the SID is our Toledo Innovation Center, a historic building that is currently undergoing extensive renovations to house wraparound services including: technical training, apprenticeships, and small business supports. The project will also encourage pedestrian and bicycle traffic necessary to empower the numerous minority-owned businesses in the Junction neighborhood and foster economic stability and growth. The streets connecting Junction to Uptown lack critical pedestrian and bicycle friendly amenities, including a scarcity of bus stops despite high ridership. This proposal will improve safety and accessibility while equipping underserved neighborhoods with increased access to education and economic development opportunities.

The City of Toledo is building upon recent federal investment, private philanthropy, and public/private partnerships that will make our region competitive for shared growth. I urge the application's favorable review consistent with your agency's rules and regulations.

Sincerely,

A handwritten signature in cursive script that reads "Marcy Kaptur".

The Honorable Pete Buttigieg
U.S. Secretary of Transportation
1200 New Jersey Ave, SE
Washington, D.C. 20590

Dear Secretary Buttigieg,

I write to bring to your attention the competitive application submitted by the City of Toledo for funding in the FY22 Rebuilding American Infrastructure with Sustainability and Equity (RAISE) discretionary grant program.

I understand that the City of Toledo seeks funding to connect the Junction neighborhood, to the Uptown neighborhood, and the Social Innovation District (SID) that is under development. This project will create multi-modal pathways, enhance the city streetscape, increase lighting, and provide additional bus stop amenities. These improvements will help increase access to job training and businesses as well as provide residents and tourists greater access to the River Walk, the public library, and other attractions.

Assistance from your agency will allow Toledo to begin construction to improve connectivity and safety while bolstering economic development and a greater sense of community.

If there are any questions, please contact my Grants Coordinator, Kristy Ramey, at (614) 469-6774. Thank you.

Sincerely,

Rob Portman

WASHINGTON, DC 20510-6075

April 08, 2022

The Honorable Pete Buttigieg
Secretary, United States Department of Transportation
1200 New Jersey Ave., SE
Washington, DC 20590

Dear Secretary Buttigieg,

I write to draw your attention to the City of Toledo Department of Transportations' application for Fiscal Year 2022 RAISE Discretionary Grant funding for the Social Innovation District (SID) improvement project.

The SID houses a variety of services including apprenticeships, small business support, and technical training to aid in the success of the individuals involved in these programs. The proposed project would connect the historically disadvantaged Junction neighborhood to the Social Innovation District. RAISE funding will be used to improve transportation by connecting the streets of Junction and SID in a manner that is pedestrian and bicycle friendly and increases bus stops for people relying on public transportation.

The economic impact of this project would improve the overall development of Toledo along with the neighborhoods around it. Connecting these areas and improving transportation has the potential to bring economic development, education, and entertainment opportunities to Toledo communities that have missed the economic development surge that has occurred in other areas of Toledo. By improving development, safety, and accessibility through RAISE funding, Toledo neighborhoods can build their wealth and support the small businesses and housing, arts, and cultural institutions located in SID and Junction.

It is important that we continue to support efforts such as the SID-Junction improvement project, which will promote major economic development and transportation connectivity interests in the city of Toledo and in the State of Ohio. Please give Toledo's application full and fair consideration.

Sincerely,

Sherrod Brown
Chairman

Dear Secretary Buttigieg:

It is my sincere pleasure to support the City of Toledo's Department of Transportation RAISE grant application. This funding opportunity is aligned incredibly well with YWCA of Northwest Ohio's vision and strategic plan for the region and will be a catalyst for the ongoing development of our transportation system. Toledo has a long history of disinvestment in many of our neighborhoods and the plan outlined in the RAISE grant application brings economic development, education, and even entertainment opportunities to neighborhoods that have missed the economic rebound that has occurred in other area of our city.

The goal of the RAISE grant is to connect the historically disadvantaged Junction neighborhood to the Uptown neighborhood, and specifically the Social Innovation District (SID) under development in Uptown. The SID is anchored by the Toledo Innovation Center which is a historic building undergoing extensive renovation in order to house a variety of services including, technical training, apprenticeships, small business supports, and other wrap around services to help ensure success of the individuals involved in the programs. The project will also bring the pedestrian and bicycle traffic necessary to support the numerous minority-owned businesses established in the Junction neighborhood and increase their economic stability. Currently, Uptown and Junction are connected by expressway overpasses without adequate pedestrian or bicycle infrastructure. Despite high ridership, the bus routes do not have bus stops with amenities. The plan outlined in the grant will improve safety and accessibility while at the same time, create a sense of neighborhood identity. Moreover, with increased access to education and economic development opportunities, residents in both neighborhoods can build their wealth.

Toledo is building on recent investments via ARP funds, private philanthropy and public/private partnerships that will continue the upward trajectory. If funded, the RAISE grant will bring additional opportunities to our neighborhoods and spur additional investment in small and minority owned businesses, housing and arts and cultural institutions. I firmly believe this vision for Uptown and Junction fit solidly within the DOT's goals and I hope to learn of its favorable review.
